## Work Experience

### CAREER BREAK — 2025-2026

- Designed and developed a personal portfolio website using React, CSS Modules, and Vite, showcasing two projects and incorporating instructor feedback on Figma designs.
- Created trunk-based development strategy with GitHub Actions and FlightControl; automated CI/CD pipelines that led to a 2X increase in deployment frequency for personal site.

### FULL STACK ENGINEER; SAINSBURY'S — 2023-2024

#### FRONTEND ENGINEER; SAINSBURY'S — 2022-2023

- Spearheaded the adoption of CSS Modules, TailwindCSS, and Fable Design System components into the frontend application, boosting code reusability by 35% and improving maintainability.
- Guided 6 junior engineers through weekly pair programming sessions focused on TypeScript and CSS knowledge, leading to a 30% improvement in knowledge sharing.
- Developed a new admin page for managing users, decreasing support workload by 25% and streamlining user management processes.
- Led a proof-of-concept Next.js rewrite to address performance bottlenecks using React Server Components, projecting a 70% page load improvement.
- Migrated front-end forms from Redux to React Hook Form, simplifying logic and improving maintainability, leading to a 30% reduction in form-related bugs.
- Resolved CI/CD pipeline reliability by debugging configuration issues and updating Cypress tests, resulting in a 10% reduction in pipeline failures.
- Designed and implemented AWS Lambda functions, orchestrating functions to synchronise hundreds advertising campaigns daily.
- Simplified design and development workflow by 30% through collaboration with the design team to standardise Figma designs.

#### FRONTEND ENGINEER; VODAFONE — 2021-2022

- Refined user experience by creating a redesigned dashboard showcasing line rentals and phone plans for business users, resulting in a 50% increase in user engagement.
- Redeveloped the Vodafone business portal dashboard using the new design system, ensuring 95% code coverage through comprehensive unit and integration tests, using Jest and Cypress.
- Accelerated frontend development by agreeing on schema with the backend team, implementing the frontend with mock API data, leading to a 70% reduction in development time.

#### FULL STACK ENGINEER; RED TECHNOLOGY — 2016-2020

##### PRODUCT ENGINEER; RED TECHNOLOGY — 2014-2016

##### JUNIOR ENGINEER; RED TECHNOLOGY — 2013-2014

- Optimised performance of slow pages through .NET debugging tools to isolate memory leaks and slow API responses resulting in a 3-10s improvement in page load times.
- Engineered a drag-and-drop functionality within the administration system using JavaScript and jQuery, directly streamlining product category management workflows and elevating overall user experience by 60%.

- Revitalised customer-facing websites during critical .NET application upgrades, dismantling 100+ errors and increasing overall website stability, decreasing page load times by 40%.
- Answered technical questions from product managers and customers gathering requirements and demonstrated new functionality to the CEO showcasing powerful new features.
- Read a book on refactoring and implemented these techniques in a test driven development approach to writing a new library.

## Technical Skills

### CORE

Javascript, TypeScript, React, HTML5, CSS3, , GraphQL, .NET, Swift, Postgres, AWS

### STYLING

Sass, CSS Modules, Tailwind CSS, Styled Components

### TOOLING & BUILD

Vite, Webpack, Node.js, Git, Github Actions

### TESTING & OPTIMISATION

Jest, React Testing Library, Vitest, DataDog, Feature Flags

### COLLABORATION & LEADERSHIP

JIRA, Code Reviews, Mentoring Engineers, Technical Guidance

## Education

University of Oxford — BA Geography, 2012
